The Detroit Public Library Barbara Madgy Cohn 2017-05-16 For the last century, the Detroit Public Library has ranked as one of the most beautiful buildings in Detroit — an important landmark as well as a significant monument serving generations of Detoniters. The Detroit Public Library: An American Classic was born out of “Discover the Wonders,” an art and architectural tour of the main library that began in December 2013. Since the tour’s inception, around seven thousand people have visited this structural gem. The Detroit Public Library was the result of numerous requests for a book that showcases the library’s many artistic and architectural wonders. As the photographs in this book reveal, the Detroit Public Library stands as an enduring symbol of the public library, one of the most democratic institutions in America. The design of the Detroit Public Library was Cass Gilbert’s vision for Detroit’s Early Italian Renaissance-style library. This book honors his work with a chronological and photographic timeline of the conception and building of the 1921 Woodward Avenue Library, the 1963 Cass Avenue addition, and the library as it is today. The book goes through the library’s transformative years, documenting the contributions of local and national artists such as Mary Chase Perry Stratton, Gari Melchers, and John Stephens Coppin, and includes photographs of the rooms they have decorated with murals, mosaics, painted windows, bronze works, architectural elements, and ornamentation. In preparing The Detroit Public Library, the authors had two fundamental desires, as they note in their preface. The first was to celebrate the main library’s design using both historic and contemporary images, the latter contributed by a number of photographers presently working in Detroit. The second was “to share with the world the beauty and elegance of a grand building in a great city that, even through the most difficult times, has sustained one of the most magnificent neo-classical buildings in the country.” The Detroit Public Library unites the interests of history buffs, art enthusiasts, library lovers, and Detroit-area locals with a tribute to one of the city’s most impressive structures. This book will appeal to those looking to learn about the
builders, the history, and the stories that brought the Detroit Public Library to fruition.

As the landlord of The Dragon's Lair and leader of The Black Dragons Motorcycle Club, Axel Carmichael has seen it all and done it all. He's a respected and experienced dom. Nothing shocks him any more, and nobody catches him off guard. When Bayden rides up to The Dragon's Lair on a bike worth more than most men earn in a year, and immediately demonstrates that he has far more attitude than sense, it's easy for Axel to write him off as a silly little rich boy who's about to get himself killed. But, there's more to Bayden than meets the eye. He's no silly little boy, rich or otherwise, and werewolves aren't easy to kill.

Customers for Life  
Carl Sewell 2009-07-01  
In this completely revised and updated edition of the customer service classic, Carl Sewell enhances his time-tested advice with fresh ideas and new examples and explains how the groundbreaking “Ten Commandments of Customer Service” apply to today’s world. Drawing on his incredible success in transforming his Dallas Cadillac dealership into the second largest in America, Carl Sewell revealed the secret of getting customers to return again and again in the original Customers for Life. A lively, down-to-earth narrative, it set the standard for customer service excellence and became a perennial bestseller. Building on that solid foundation, this expanded edition features five completely new chapters, as well as significant additions to the original material, based on the lessons Sewell has learned over the last ten years. Sewell focuses on the expectations and demands of contemporary consumers and employees, showing that businesses can remain committed to quality service in the fast-paced new millennium by sticking to his time-proven approach: Figure out what customers want and make sure they get it. His “Ten Commandments” provide the essential guidelines, including: • Underpromise, overdeliver: Never disappoint your customers by charging them more than they planned. Always beat your estimate or throw in an extra service free of charge. • No complaints? Something’s wrong: If you never ask your customers what else they want, how are you going to give it to them? • Measure everything: Telling your employees to do their best won’t work if you don’t know how they can improve.

Achtung-Panzer! Heinz Guderian 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Just Needs a Recharge Rob Siegel 2018-04-24 Air conditioning in vintage cars often falls into disrepair, as owners figure that it never really worked all that well when it was new, and assume that rejuvenation would be prohibitively expensive. In his new book, Just Needs a Recharge: The Hack Mechanic Guide to Vintage Air Conditioning, Rob Siegel details exactly what's needed to resurrect long-dead air conditioning in a vintage car, or install a/c in a car that never had it. In a level of detail not found in any other automotive a/c book, Rob reveals what you need to know about flare and o-ring fittings, upgrading to a rotary-style compressor and a parallel-flow condenser, making or specifying custom hoses, and selecting refrigerant so that the a/c blows cold enough to be usable. Although the book draws from Rob's BMW experience (with specifics for the BMW
2002 and 3.0CS), and concentrates on vintage a/c systems (those that have flare fittings and originally contained R12), most of the information applies to any air conditioning system, foreign or domestic, vintage or modern. Written in Rob's entertaining Hack Mechanic narrative voice, and including 240 photographs and illustrations, the book covers theory, the choice of refrigerant (R12, R134a, other EPA-approved, non-EPA-approved), legality, tools for a/c work, fittings and sizes, the compressor, the evaporator assembly and expansion valve or orifice tube, the condenser and fan, the receiver/drier or accumulator, electrical connections and compressor cycling, connecting and using manifold gauges, the basic steps for a/c rejuvenation, from-scratch a/c retrofit, making and installing hoses, flushing the system, pressure-testing and leak detection, evacuating and charging the system troubleshooting, and other things that heat up the cabin.

Don "The Snake" Prudhomme: My Life Beyond the 1320
Elana Scherr 2020-10-16
Don "The Snake" Prudhomme reveals for the first time ever his incredible life and career on and off of the drag strip.

Imagine spending a year with Don "The Snake" Prudhomme, having coffee together and talking about his life, his racing, his friends, and his family. He'd tell you about how he rose from being a high school drop-out who was painting cars to a respected Top Fuel dragster driver and successful businessman. You'd hear how he toured the country with Tommy Ivo and "The Hawaiian" Roland Leong, racing all the legends from "Big Daddy" Don Garlits to "The Golden Greek" [Chris] Karamesines. He'd say how he met Tom McEwen and recall how they became the Snake and the Mongoose, leading to a career in Funny Cars that netted him four championships in a row. He'd talk about the thrill of first wins and owning his own teams but also the struggles of bad seasons, crashes and fires, broken parts, and broken contracts. Along the way, he'd speak about the people in his life, such as engine-builder Keith Black and NHRA president Wally Parks, and those who were killed in the wild and unpredictable sport of nitro racing. It wouldn't be only racing, though. Prudhomme would share lessons he learned about business and life from such varied sources as a neighbor in Granada Hills to Ford GT40 driver Dan Gurney. He also would talk about the importance of family: how his wife, Lynn, and daughter, Donna, changed his world and how finding out about his African-American roots opened his eyes to a culture and inheritance he'd always wanted. This is the experience you'll get in Don "The Snake" Prudhomme: My Life Beyond the 1320.

**We Were the Ramchargers** David G. Rockwell 2009 This book takes you behind the scenes with the group of Chrysler engineers who, from the 1950s through the 1970s, became one of the most successful and influential drag racing teams of all time. The only team of engineers from an automobile manufacturer to drag race successfully, the Ramchargers broke the most time barriers in drag racing history and earned the most National Hot Rod Association (NHRA) Super Stock titles during the sport's golden era of factory competition. Dave Rockwell, a Ramcharger himself, interviewed more than 40 team members, competitors, and track operators for We Were the Ramchargers, the first book to provide inside details on all elements of the Ramchargers story. In addition to chronicling the races they won and legendary cars they developed (including the High and Mighty, 426 Hemi, and first Funny Car), Rockwell opens corporate and personal files to take readers behind the doors at Chrysler (showing, among other things, how the Ramchargers helped pioneer the platform team concept), while revealing the personalities of the men who made it all happen.
