Immanuel's Veins Ted Dekker 2011-05-30 This story is for everyone--but not everyone is for this story. It is a dangerous tale of times past. A love story full of deep seduction. A story of terrible longing and bold sacrifice. Then as now, evil begins its courtship cloaked in light. And the heart embraces what it should flee. Forgetting it once had a truer lover. With a kiss, evil will ravage body, soul, and mind. Yet there remains hope, because the heart knows no bounds. Love will prove greater than lust. Sacrifice will overcome seduction. And blood will flow. Because the battle for the heart is always violently opposed. For those desperate to drink deep from this fountain of life, enter. But remember, not everyone is for this story. "A heart-wrenching journey of redemption and hope that left me sobbing, laughing, and crying to every word."--Donna McChristian, 44, Environmental Chemist

The End Of Science John Horgan 2015-04-14 As staff writer for Scientific American, John Horgan has a window on contemporary science unsurpassed in all the world. Who else routinely interviews the likes of Lynn Margulis, Roger Penrose, Francis Crick, Richard Dawkins, Freeman Dyson, Murray Gell-Mann, Stephen Jay Gould, Stephen Hawking, Thomas Kuhn, Chris Langton, Karl Popper, Stephen Weinberg, and E.O. Wilson, with the freedom to probe their innermost thoughts? In The End Of Science, Horgan displays his genius for getting these larger-than-life figures to be simply human, and scientists, he writes, "are rarely so human . . . so at there mercy of their fears and desires, as when they are confronting the limits of knowledge."This is the secret fear that Horgan pursues throughout this remarkable book: Have the big questions all been answered? Has all the knowledge worth pursuing become known? Will there be a final "theory of everything" that signals the end? Is the age of great discoverers behind us? Is science today reduced to mere puzzle solving and adding details to existing theories? Horgan extracts surprisingly candid answers to there and other delicate questions as he discusses God, Star Trek, superstrings, quarks, plectics, consciousness, Neural Darwinism, Marx's view of progress, Kuhn's view of revolutions, cellular automata, robots, and the Omega Point, with Fred Hoyle, Noam Chomsky, John Wheeler, Clifford Geertz, and dozens of other eminent scholars. The resulting narrative will both infuriate and delight as it mindless Horgan's smart, contrarian argument for "endism" with a witty, thoughtful, even profound overview of the entire scientific enterprise. Scientists have always set themselves apart from other scholars in the belief that they do not construct the truth, they discover it. Their work is not interpretation but simple revelation of what exists in the empirical universe. But science itself keeps imposing limits on its own power. Special relativitiy prohibits the transmission of matter or information as speeds faster than that of light; quantum mechanics dictates uncertainty; and chaos theory confirms the impossibility of complete prediction. Meanwhile, the very idea of scientific rationality is under fire from Neo-Luddites, animal-rights activists, religious fundamentalists, and New Agers alike. As Horgan makes clear, perhaps the greatest threat to science may come from losing its special place in the hierarchy of disciplines, being reduced to something more akin to literary criticism as more and more theoreticians engage in the theory twiddling he calls "ironic science." Still, while Horgan offers his critique, grounded in the thinking of the world's leading researchers, he offers homage too. If science is ending, he maintains, it is only because it has done its work so well.

Nothing is right about this place or the other students in it. Here I am, a mere mortal among gods—or monsters. I still can't decide which of these warring factions I belong to, if I belong at all. I only know the one thing that unites them is their hatred of me. Then there's Jaxon Vega. A vampire with deadly secrets who hasn't felt anything for a hundred years. But there's something about him that calls to me, something broken in him that somehow fits with what’s broken in me. Which could spell death for us all. Because Jaxon walled himself off for a reason. And now someone wants to wake a sleeping monster, and I'm wondering if I was brought here intentionally—as the bait. ***INCLUDES 3 BONUS SCENES FROM THE HERO'S POY*** Don't miss a single book in the series that spawned a phenomenon! To the Lighthouse Virginia Woolf 2021-06-24 Described by Virginia Woolf herself as 'easily the best of my books', and by her husband Leonard as a 'masterpiece', To the Lighthouse, first published in 1927, is one of the milestones of Modernism. Set on the Isle of Skye, over a decade spanning the First World War, the narrative centres on the Ramsay family, and is framed by Mrs Ramsay's promise to take a trip to the lighthouse the next day – a promise which isn’t to be fulfilled for a decade. Flowing from character to character and from year to year, the novel paints a moving portrait of love, loss and perception. Bearing all the hallmarks of Woolf's prose, with her delicate handling of the complexities of human relationships, To the Lighthouse has earned its reputation - frequently appearing in lists of the best novels of the twentieth century, it has lost not an iota of brilliance.

Charlie and the Chocolate Factory Roald Dahl 2007-08-16 Willy Wonka's famous chocolate factory is opening at last! But only five lucky children will be allowed inside. And the winners are: Augustus Gloop, an enormous fat boy whose hobby is eating; Veruca Salt, a spoiled-rootten brat whose parents are wrapped around her little finger; Violet Beauregarde, a dim-witted gum-chewer with the fastest jaws around; Mike Teavee, a toy pistol-toting gangster-in-training who is obsessed with television; and Charlie Bucket, Our Hero, a boy who is honest and kind, brave and true, and good and ready for the wildest time of his life!

**Strengthening Forensic Science in the United States**
National Research Council 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community.

The book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science practitioners. It is a must-read for anyone interested in the future of forensic science.

**Freerfall**
Jessica Barry 2019-01-08 A MOST ANTICIPATED BOOK OF 2019: Entertainment Weekly | USA Today | Parade | Cosmopolitan | New York Post | PopSugar | Goodreads "Jessica Barry’s Freerfall is not only an enthralling, impossible-to-put-down mystery that keeps the pages flying, but it is also a gorgeous, resonant tale of a mother’s unconditional love for her daughter. I could not recommend this book!" — Aimee Molloy, New York Times bestselling author of The Perfect Mother “An absorbing treat.” — PEOPLE Magazine “The corporate malfeasance and shady conspiracies of John Grisham, with the frank feminism of two rounded female protagonists.” — Entertainment Weekly They say your daughter is tough to tackle. And can Maggie uncover the truth in time to save her daughter? The Love Hypothesis Ali Hazelwood 2021 Includes an excerpt from Love on the Brain. The Twilight of Cutting Saida Hodzic 2016-11-15 The last three decades have witnessed a proliferation of nongovernmental organizations engaging in new campaigns to end the practice of female genital cutting across Africa. These campaigns have in turn spurred new institutions, discourses, and political projects, bringing about unexpected social transformations, both intended and unintended. Consequently, cutting is waning across the continent. At the same time, these endings are misrepresented and disavowed by public and scholarly discourses across the political spectrum. What does it mean to say that while cutting is ending, the Western discourse surrounding it is on the rise? And what kind of feminist alliances are needed in constituencies both inside and outside of the United States? The Twilight of Cutting examines these and other questions from the vantage point of Ghanaian feminist and reproductive health NGOs that have organized campaigns against cutting for over thirty years. The book looks at these NGOs not as solutions but as sites of “problematization.” The purpose of understanding these Ghanaian campaigns, their transnational and regional encounters, and the forms of governmentality they produce is not to charge them with providing answers to the question, how do we end cutting? Instead, it is to account for their work, their historicity, the life worlds and subjectivities they engender, and the modes of resistance, intervention critique, and opposition they set in motion.
