Local Government and Strategic Choice J.K. Friend
2016-08-03 Local Government and Strategic Choice, Second Edition is the result of a study of policy-formation in the City Council of Coventry during a four-year period. This edition is a reappraisal of the earlier edition, with an emphasis on "connective planning." Part I describes the planning strategies made in an urban setting. This part explains the City and the City Council, organization of the local authority, decision-making mechanisms, developmental planning including land use, school system planning, and cross-departmental planning. Part II is a study of city planning as a process of strategic choice that has been altered in many different ways depending on the purpose. This part also discusses the problems encountered in the planning process such as the existence of organization boundaries in the government sector.
Part III deals with a fictional case that relates the uncertainties and political realities of decision-making in an urban setting. The case studies cover land allocation and development, tax, and traffic issues. Part IV discusses organizational challenge and also touches in some way on the future organizational structure of local governments. This text then explains the need for "connective planning" of how individuals build flexible networks among decision-making agencies to serve the various interests of both the private and government sectors. This book is suitable for sociologists, city administrators and officials, local government officials, heads of government agencies, and heads of planning and engineering departments of local government units.

The Asia-Pacific region has shown fast economic growth for several decades which is expected to continue. In this context, Asia has become the “production engine” of the global economy. At the same time scientific reports reveal that some planetary boundaries are crossed, for example relating to biodiversity and climate change. Companies in the Asia-Pacific region are therefore increasingly challenged to reduce their environmental impacts, to document their social contribution and to contribute to sustainable development. Key approaches to identify sustainability problems and challenges, to support improvement processes and to back up sustainability contributions include accounting and reporting. In contrast to the high relevance of accounting and reporting for corporate sustainability for the Asia-Pacific region, academic research has so far been dominated by Western researchers and predominantly dealt with Western and Japanese cases and approaches. It is thus time to take account of Asian perspectives on accounting and reporting for sustainability in the Asia-Pacific region. **Commonwealth Telephone Directory** Pennsylvania. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child’s brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents’ lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents’ use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and
on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Communities in Action National Academies of Sciences, Engineering, and Medicine 2017-04-27 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

The Financial Crisis Inquiry Report Financial Crisis Inquiry Commission 2011-05-01 The Financial Crisis Inquiry Report, published by the U.S. Government and the Financial Crisis Inquiry Commission in early 2011, is the official government report on the United States financial collapse and the review of major financial institutions that bankrupted and failed, or would have without help from the government. The commission and the report were implemented after Congress passed an act in 2009 to review and prevent fraudulent activity. The report details, among other things, the periods before, during, and after the crisis, what led up to it, and analyses of subprime mortgage lending, credit expansion and banking policies, the collapse of companies like Fannie Mae and Freddie Mac, and the federal bailouts of Lehman and AIG. It also discusses the aftermath of the fallout and our current state. This report should be of interest to anyone concerned about the financial situation in the U.S. and around the world.

THE FINANCIAL CRISIS INQUIRY COMMISSION is an independent, bi-partisan, government-appointed panel of 10 people that was created to "examine the causes, domestic and global, of the current financial and economic crisis in the United States." It was established as part of the Fraud Enforcement and Recovery Act of 2009. The commission consisted of private citizens with expertise in economics and finance, banking, housing, market regulation, and consumer protection. They examined and reported on "the collapse of major financial institutions that failed or would have failed if not for exceptional assistance from the government."

**Local Government and Strategic Choice (Routledge Revivals)**
John Friend 2013-10-14 First published in 1969, this book is concerned with the processes of policy-making in local government. The authors address themselves to the basic challenge of planning in a democracy and consider issues such as how those elected to exercise choice on our behalf can preserve and expand their capacity to choose discriminately, when the sheer complexity of the issues facing them tends all the time to make them increasingly dependent on the skills and judgements of their professional advisers. This question is explored in relation to the many different, yet interdependent, aspects of the planning process which impinge on any local community – with particular reference to the planning of housing, transport, education, and shopping, of land use and local government finance. The book is the outcome of a four-year program of research during which a mixed team of operational research and social scientists was given a unique opportunity to observe the ways in which decisions were made and plans formulated in one particular city- Coventry. It covers both political and professional aspects of local government in 1960s Great Britain and has had important implications for urban governments throughout the world.

**Financial Accounting with International Financial Reporting Standards**
Jerry J. Weygandt 2018-07-18
While there is growing interest in IFRS within the US, interest outside the US has exploded. Weygandt's fourth edition of Financial Accounting: IFRS highlights the integration of more US GAAP rules, a desired feature as more foreign companies find the United States to be their largest market. The highly anticipated new edition retains each of the key features (e.g. TOC, writing style, pedagogy, robust EOC) on which users of Weygandt Financial have come to rely, while putting the focus on international companies/examples, discussing financial accounting principles and procedures within the context of IFRS, and providing EOC exercises and problems that present students with foreign currency examples instead of solely U.S. dollars.
