Struggling for his life, Peter Hardin felt the hand of his wife being torn from his grip as the huge white letters on the supertanker’s stern—Leviathan—steamed away. Now back in print for the first time in twenty-five years, The Shipkiler is the story of one man determined to win at sea the justice he has been denied on land.

A History of the Grandparents I Never Had Ivan Jablonka 2016-05-11 Ivan Jablonka's grandparents' lives ended
long before his began: although Matès and Idesa Jablonka were his family, they were perfect strangers. When he set out to uncover their story, Jablonka had little to work with. Neither of them was the least bit famous, and they left little behind except their two orphaned children, a handful of letters, and a passport. Persecuted as communists in Poland, as refugees in France, and then as Jews under the Vichy regime, Matès and Idesa lived their short lives underground. They were overcome by the tragedies of the twentieth century: Stalinism, the mounting dangers in Europe during the 1930s, the Second World War, and the destruction of European Jews. Jablonka's challenge was, as a historian, to rigorously distance himself and yet, as family, to invest himself completely in their story. Imagined oppositions collapsed—between scholarly research and personal commitment, between established facts and the passion of the one recording them, between history and the art of storytelling. To write this book, Jablonka traveled to three continents; met the handful of survivors of his grandparents' era, their descendants, and some of his far-flung cousins; and investigated twenty different archives. And in the process, he reflected on his own family and his responsibilities to his father, the orphaned son, and to his own children and the family wounds they all inherited. A History of the Grandparents I Never Had cannot bring Matès and Idesa to life, but Jablonka succeeds in bringing them, as he soberly puts it, to light. The result is a gripping story, a profound reflection, and an absolutely extraordinary history.

Healing Homosexuality Joseph Nicolosi 1997-11-01 In 1973, when all the arguments were presented to the American Psychiatric Association both for and against the idea of homosexuality as pathology, it was the personal disclosures of gay men that had the most influence. Listening to their stories of frustration in treatment—and their newfound happiness through acceptance of a gay identity—the American Psychiatric Association voted to omit homosexuality as a diagnostic category. Now, twenty years later, Dr. Joseph Nicolosi presents the opposite kind of personal testimony. This testimony is from homosexual men who have tried to accept a gay identity but were dissatisfied, and then benefitted from psychotherapy to help free them of homosexuality. While each client has his unique story, Nicolosi has chosen eight men as representative of the personalities he has encountered in the twelve years during which he has treated over 200 homosexual clients. These men are engaged in a "two-front war"—an internal assault against their own unwanted desires, and an external battle against a popular culture that does not understand or value their struggle. In their own words, we hear these men's struggles to develop healthy, non-erotic male friendships. We hear of their fear and anger toward the men in their lives, and their strained
relationships with the fathers they never understood. Nicolosi contends that every man possesses aspects of these clients: The frailty of Albert, the integrity of Charlie, the rage of Dan, the narcissism of Steve, and the ambivalence of Roger, to list some of them. Some readers of this book may be surprised by the directive style of Dr. Nicolosi's therapeutic intervention. In part, this is due to the editorial synthesis of the transcript. More importantly, however, reparative therapy does require a more involved therapist—a benevolent provocateur who departs from the tradition of uninvolved, opaque analyst to become a salient male presence. The therapist must balance active challenge with warm encouragement to follow the father-son model.

The Built Idea

Alberto Campo Baeza
2015-03-01 Hardcover in clamshell box: Architects reveal the keys to Architecture in their drawings, their floor plans, sections and also in their writings. It is important to appreciate the concise texts of Mies Van der Rohe or the more passionate expressions of Le Corbusier. And that is how I would like these texts, published here today, to be understood. Alberto Campo Baeza (born Valladolid, Spain, 1946) is one of the most important architects of the modern period. The Built Idea presents a series of seminal texts in which he conveys his most deeply-held architectural ideas and convictions, exploring and explaining his foundational influences and subjects such as the importance of light, the work of his contemporaries, and the future of architecture, as well as accounts of his own work and personal anecdotes from a rich and successful life in architecture. To use words that express one's intentions clearly is not just a convenience for architects. One wants to let people know the meaning behind the things that are being made. My aim in publishing these texts is precisely that. This book also includes a photographic documentation of Campo Baeza's greatest works along with architectural sketches, plans and models to provide a privileged insight into one of the greatest architectural minds working today. And the reasoning on which one bases one's work in their attempt at Architecture is what is going to be reflected here in these texts, some of it consciously, some unconsciously. Realizing the ideas expressed in these words in built works is of course the best proof that the ideas are valid and the words true."

The Modernization of Labour Law and Industrial Relations in a Comparative Perspective
Silvia Spattini
2009-01-01 Not all labour law and industrial relations scholars agree on the efficacy of the comparative approach - that the analysis of measures adopted in other countries can play a constructive role in national and local policy-making. However, the case deserves to be heard, and no better such presentation has appeared than this remarkable book, the carefully considered work of over 40 well-known
authorities in the field from a wide
variety of countries including
Australia, France, India, Israel,
Peru, Poland, and South Africa. The
volume contains papers delivered at a
conference sponsored by the Marco
Biagi Foundation at the University of
Modena and Reggio Emilia in March
2008.

The Third Industrial Revolution
Jeremy Rifkin 2011-10-04 The
Industrial Revolution, powered by oil
and other fossil fuels, is spiraling
into a dangerous endgame. The price
of gas and food are climbing,
unemployment remains high, the
housing market has tanked, consumer
and government debt is soaring, and
the recovery is slowing. Facing the
prospect of a second collapse of the
global economy, humanity is desperate
for a sustainable economic game plan
to take us into the future. Here,
Jeremy Rifkin explores how Internet
technology and renewable energy are
merging to create a powerful "Third
Industrial Revolution." He asks us to
imagine hundreds of millions of
people producing their own green
energy in their homes, offices, and
factories, and sharing it with each
other in an "energy internet," just
like we now create and share
information online. Rifkin describes
how the five-pillars of the Third
Industrial Revolution will create
thousands of businesses, millions of
jobs, and usher in a fundamental
reordering of human relationships,
from hierarchical to lateral power,
that will impact the way we conduct
commerce, govern society, educate our
children, and engage in civic life.
Rifkin's vision is already gaining
traction in the international
community. The European Union
Parliament has issued a formal
declaration calling for its
implementation, and other nations in
Asia, Africa, and the Americas, are
quickly preparing their own
initiatives for transitioning into
the new economic paradigm. The Third
Industrial Revolution is an insider's
account of the next great economic
era, including a look into the
personalities and players — heads of
state, global CEOs, social
entrepreneurs, and NGOs — who are
pioneering its implementation around
the world.

Leadership in Administration
Philip Selznick 2011-05-11 Foundational
study of how institutions work and
how leadership promotes them. Often
cited in many fields and consistently
assigned to classes in a variety of
departments -- including sociology
and business, and executive training
in management and military leadership
-- this book is considered to have
virtually created the modern field of
institutional-leadership management.
It is still recognized as a lively
and accessible presentation of the
institutionalist school's answer to
traditional "rationalist" approaches.
Selznick's analysis goes beyond
efficiency and traditional loyalty: he
examines the more nuanced
variables of effective leadership of
organizations in business, education,
government, the military, and labor.

Gunning for God
John Lennox 2011
Atheism is on the march in the
western world, and its enemy is God.
Religion, the "New Atheists" claim,
"is dangerous", it "kills" or
"poisons everything". And if religion
is the problem with the world, their
answer is simple: get rid of it. But
are things really so straightforward?
Tackling the likes of Richard
Dawkins, Stephen Hawking, Christopher
Hitchens, and Daniel Dennett head on,
John Lennox highlights the fallacies
in their approach, arguing that
their irrational and unscientific
methodology leaves them guilty of the same obstinate foolishness of which they accuse dogmatic religious folks. Erudite and wide-ranging, Gunning for God packs some debilitating punches. It also puts forward new ideas about the nature of God and Christianity that will give the New Atheists' best friends and worst enemies alike some stimulating food for thought. **WITCHERY OF ARCHERY** Maurice 1844-1901 Thompson 2016-08-27

**Creative Intelligence** Bruce Nussbaum 2013-03-05 Offering insights from the spheres of anthropology, psychology, education, design, and business, Creative Intelligence by Bruce Nussbaum, a leading thinker, commentator, and curator on the subjects of design, creativity, and innovation, is first book to identify and explore creative intelligence as a new form of cultural literacy and as a powerful method for problem-solving, driving innovation, and sparking start-up capitalism. Nussbaum investigates the ways in which individuals, corporations, and nations are boosting their creative intelligence — CQ—and how that translates into their abilities to make new products and solve new problems. Ultimately, Creative Intelligence shows how to frame problems in new ways and devise solutions that are original and highly social. Smart and eye opening, Creative Intelligence: Harnessing the Power to Create, Connect, and Inspire illustrates how to connect our creative output with a new type of economic system, Indie Capitalism, where creativity is the source of value, where entrepreneurs drive growth, and where social networks are the building blocks of the economy.
