Cyclic Nucleotides in the Nervous System

John Daly

1977-03 The elucidation of the cellular and molecular bases underlying the integrated function of the central nervous system, both in disease and in health, must ultimately come from the combined efforts of scientists from many disciplines, including biology, chemistry, histology, pathology, physiology, pharmacology, and psychology. Communication between scientists from these various disciplines-vital to the advancement of our understanding of the function of the nervous system-has become more and more difficult in recent years. Both increasing specialization and the incredible increases in publications pertinent to brain research in a wide spectrum of journals, in symposium volumes, in monographs, in abstracts, and in reviews contribute to the problems of cross-communication and even of communication within a scientific discipline. Research on the significance of cyclic nucleotides to the function of nervous systems is particularly illustrative of the communication problem. Since the initial publications by Sutherland, Rall, and Butcher in the late fifties and early sixties on high levels of adenylate cyclase, phosphodiesterases, and cyclic AMP in brain, the ensuing literature of this field has expanded exponentially. At the present time, from five to ten publications relevant to cyclic nucleotides and the
nervous system appear each week. Indeed, these are minimal numbers based mainly on examination of literature titles and key index words. Many articles concerned with some aspect of central function contain, buried within their text, experiments with or related to cyclic nucleotides.

_The Tattooist of Auschwitz_ Heather Morris 2018-09-04 The #1 International Bestseller & New York Times Bestseller
This beautiful, illuminating tale of hope and courage is based on interviews that were conducted with Holocaust survivor and Auschwitz-Birkenau tattooist Ludwig (Lale) Sokolov—an unforgettable love story in the midst of atrocity. “The Tattooist of Auschwitz is an extraordinary document, a story about the extremes of human behavior existing side by side: calculated brutality alongside impulsive and selfless acts of love. I find it hard to imagine anyone who would not be drawn in, confronted and moved. I would recommend it unreservedly to anyone, whether they’d read a hundred Holocaust stories or none.”—Graeme Simsion, internationally bestselling author of The Rosie Project
In April 1942, Lale Sokolov, a Slovakian Jew, is forcibly transported to the concentration camps at Auschwitz-Birkenau. When his captors discover that he speaks several languages, he is put to work as a Tätowierer (the German word for tattooist), tasked with permanently
marking his fellow prisoners. Imprisoned for over two and a half years, Lale witnesses horrific atrocities and barbarism—but also incredible acts of bravery and compassion. Risking his own life, he uses his privileged position to exchange jewels and money from murdered Jews for food to keep his fellow prisoners alive. One day in July 1942, Lale, prisoner 32407, comforts a trembling young woman waiting in line to have the number 34902 tattooed onto her arm. Her name is Gita, and in that first encounter, Lale vows to somehow survive the camp and marry her. A vivid, harrowing, and ultimately hopeful recreation of Lale Sokolov's experiences as the man who tattooed the arms of thousands of prisoners with what would become one of the most potent symbols of the Holocaust, The Tattooist of Auschwitz is also a testament to the endurance of love and humanity under the darkest possible conditions.
