Smart and Sustainable Planning for Cities and Regions Adriano Bisello 2018-04-25 This book comprises a selection of the top contributions presented at the second international conference “Smart and Sustainable Planning for Cities and Regions 2017”, held in March 2017 in Bolzano, Italy. Featuring forty-six papers by policy-makers, academics and consultants, it discusses current groundbreaking research in smart and sustainable planning, including the progress made in overcoming cities’ challenges towards improving the quality of life.

Climate change adaptation and mitigation of global warming, generally identified as drivers of global policies, are just the “tip of the iceberg” when it comes to smart energy transition. Indeed, equally relevant towards this current transformation — and key topics in this volume — are ICTs, public spaces and society; next economy for the city; strategies and actions for good governance; urban-rural innovation; rethinking mobility. The book’s depth in understanding and insightfulness in re-thinking demonstrate the breaking of new ground in smart and sustainable planning. A new ground that policy-makers, academics and consultants may build upon as a bedrock for smart and sustainable planning.

Clinical Guide to Exposure Therapy Jasper A. J. Smits 2022-09-14 Clinical Guide to Exposure Therapy provides evidence-based guidance on how to incorporate and tailor exposure therapy for patients who present with problems beyond fear and its disorders. Exposure therapy is a relatively easy-to-implement intervention with powerful effects. Helping clinicians expand their reach and effectiveness, this clinician’s guide includes chapters on (1) considerations for deviating from standard exposure protocols when patients present with comorbid psychiatric or medical conditions and (2) how to use exposure therapy in the treatment of conditions that do not center on fear or anxiety (e.g., eating disorders, obesity, depression, substance use disorders, chronic pain). Complementing existing resources for clinicians on exposure therapy for the treatment of anxiety disorders, this volume provides guidance on issues related to the planning and implementation of exposure interventions more broadly. This clinical guide an essential resource for the advanced trainee and clinician providing exposure therapy for complex comorbidities and unique populations.

**The European Blood and Marrow Transplantation Textbook for Nurses** Michelle Kenyon 2018-03-14 This book is open access under a CC BY 4.0 license. This textbook, endorsed by the European Society for Blood and Marrow Transplantation (EBMT), provides adult and paediatric nurses with a full and informative guide covering all aspects of transplant nursing, from basic principles to advanced concepts. It takes the reader on a journey through the history of transplant nursing, including essential and progressive elements to help nurses improve their knowledge and benefit the patient experience, as well as a comprehensive introduction to research and auditing methods. This new volume specifically intended for nurses, complements the ESH-EBMT reference title, a popular educational resource originally developed in 2003 for physicians to accompany an annual training course also serving as an educational tool in its own right. This title is designed to develop the knowledge of nurses in transplantation. It is the first book of its kind specifically targeted at nurses in this specialist field and acknowledges the valuable contribution that nursing makes in this area. This volume presents information that is essential for the education of nurses new to transplantation, while also offering a valuable resource for more experienced nurses who wish to update their knowledge.

overload by combining techniques from data mining, machine learning, natural language processing, information retrieval, and knowledge management. Similarly, link detection — a rapidly evolving approach to the analysis of text that shares and builds upon many of the key elements of text mining — also provides new tools for people to better leverage their burgeoning textual data resources. The Text Mining Handbook presents a comprehensive discussion of the state-of-the-art in text mining and link detection. In addition to providing an in-depth examination of core text mining and link detection algorithms and operations, the book examines advanced pre-processing techniques, knowledge representation considerations, and visualization approaches. Finally, the book explores current real-world, mission-critical applications of text mining and link detection in such varied fields as M&A business intelligence, genomics research and counter-terrorism activities.

Sustainability Assessment of Urban Systems Claudia R. Binder 2020-02-29 Our world is becoming more urban. More than fifty percent of the global population now lives in cities, which poses new challenges for sustainable development. This book integrates theory and methods of sustainability assessment with concepts from systems science to provide guidelines for assessing the sustainability of urban systems. It discusses different aspects of urban sustainability, from energy and housing, to mobility and health, covering social, economic and environmental factors, as well as the various stakeholders and actors involved. The book argues for the need to find models and solutions in order to design sustainable cities of the future in light of the complexity of urban social life. Including diverse case studies from the developed and developing world, this book provides a useful reference for researchers and students from a broad range of disciplines working in the field of sustainability, as well as for environmental consultants and policy makers.
