analysis of the customary rules of international humanitarian law applicable in international and non-international armed conflicts. In the absence of ratifications of important treaties in this area, this is clearly a publication of major importance, carried out at the express request of the international community. In so doing, this study identifies the common core of international humanitarian law binding on all parties to all armed conflicts.

Administrative Law in a Global Era Alfred C. Aman, Jr. 2019-06-07 Alfred C. Aman here examines how the U.S. public law system has adapted to change and how the regulatory structures and discourses of the past are being transformed by the global realities of the present. Tracing the evolution of administrative law during the regulatory eras of the New Deal and the environmental period of the 1960s and 70s as well as the current global deregulatory era beginning with the Reagan administration, he illuminates key trends in the interpretation of constitutional and administrative law. In the course of examining important shifts in administrative law, Aman provides insights into the process of legal change and the discourses that shape our legal order. He also considers why such issues as the constitutionality of administrative agencies once again are serious legal concerns, and he assesses the trend toward increasing executive power over federal administrative agencies. This timely book will be welcomed by legal scholars, political scientists, American historians, policymakers, and other readers interested in the history and future of administrative law and international and domestic environmental regulation.

Program Evaluation and Performance Measurement James C. McDavid 2012-10-25 Program Evaluation and Performance Measurement: An Introduction to Practice, Second Edition offers an accessible, practical introduction to program evaluation and performance measurement for public and non-profit organizations, and has been extensively updated since the first edition. Using examples, it covers topics in a detailed fashion, making it a useful guide for students as well as practitioners who are participating in program evaluations or constructing and implementing performance measurement systems. Authors James C. McDavid, Irene Huse, and Laura R. L. Maison direct readers through conducting quantitative and qualitative program evaluations, needs assessments, cost-benefit and cost-effectiveness analyses, as well as constructing, implementing and using performance measurement systems. The importance of professional judgment is highlighted throughout the book as an intrinsic feature of evaluation practice.

Price Setting and Price Regulation in Health Care OECD 2019-06-26 The objectives of this study are to describe experiences in price setting and how pricing has been used to attain better coverage, quality, financial protection, and health outcomes. It builds on newly commissioned case studies and lessons learned in calculating best practices and identify areas for future research, particularly in low- and middle-income settings. The report and the case studies were jointly developed by OECD and the World Health Organization (WHO) and the WHO Price Setting Project. It includes key information about the national and international frameworks of existing systems, insights for price regulation, and concrete recommendations for action. The report has been extensively updated since the first edition. Using examples, it covers topics in a detailed fashion, making it a useful guide for students as well as practitioners interested in the history and future of administrative law and international and domestic environmental regulation.

clinician working in assisted reproductive technologies (ART). Divided thematically into four main sections, part one discussed the establishment and organization of the IVF unit, including location, design and construction, practical considerations for batching IVF cycles, and regulations and risk management. Part two, the largest section, covers the many aspects of overall quality management and its implementation – staff and patient management, cryobank and PGD/PGS management, and data management – as well as optimization of treatment outcomes and statistical process control analysis to assess quality variation. Part three addresses the relationship between IVF units and society at large, including the ethics of IVF treatment, as well as public/low-cost and private/corporate IVF units. Advertising and marketing for IVF units is discussed in part four, including the building and managing of websites and the use of traditional print and social media. With approximately five thousand IVF units worldwide and a growing number of training programs, Organization and Management of IVF Units is a key resource for clinic directors, unit managers, embryologists, quality experts, and students of reproductive medicine and clinical embryology.
