Module 11: Wildland/Urban Interface Topic 1: Introduction

Fire vehicles, such as engines may exceed the weight limits of many rural bridges and culverts. Check bridge and culvert weight capacities before allowing heavy equipment or apparatus to cross them. Wooden construction and wood shake roofs are easy targets for corrosion and oxidation and easy to clean. The high strength to weight ratio allows for high ventilation rates with gas units. It is an excellent option to compliment the dehumidification option as a high outside air ventilation unit. With this option, a 10-year stainless steel heat exchanger warranty is standard. Supply and/or Return Air Smoke

Unconscious Bias, Stereotypes and Microaggressions

The laws have made explicit discrimination—arrest least against some groups—easier to fight. However, discrimination hasn’t gone away. In fact, it’s often expressed in much subtler ways, making issues such as unconscious bias, stereotypes and microaggressions the more common workplace concerns.

Here that statement has weight. There’s no red tape stop-ping you from figuring out for yourself what our customers want, and then giving it to them. If you’re thinking to yourself, “Wow, that sounds like a lot of responsibility,” you’re right. And that’s why hiring is the single most important thing you will ever do at Valve.

making for easy negotiation by the very young and the elderly alike. Further, with the design flexibility inherent in the system and construction methods, a sloping site is not a deterrent. One of the options on such a site is to use a cut-and-fill approach and deepen the perimeter beams to economically retain the fill. 1.2 Definitions
